

Elke Heymans

Senior Fullstack Developer

☎ (+32) 495 42 78 19 | ✉ el.heyman@gmail.com | 🔗 ElkeCodes | 🌐 elkecodes.dev | 📍 Lokeren, Belgium

Senior Fullstack Developer with 13 years of shipping high-performance, accessible web applications in a variety of technologies. Focused on aligning business needs with technical solutions, modernizing legacy architectures, leading engineering teams, and using AI tools to accelerate development while delivering high quality products.

Experience

Fullstack consultant

Sopra Steria Belgium (formerly Ordina Belgium)

Mar 2018 - Present

Developed fullstack applications for multiple clients using React, Vue, Angular, Node.js, and Python. Managed a team of 13 developers for 16 months, balancing client work with career mentorship.

Fullstack Developer | Vue & Python

Meemoo

Oct 2025 - Present

- Migrating the frontend to use TypeScript, adding **unit and integration tests** with Vitest & Testing Library
- Developing new features in the GIVE metadata project by extending the existing **Vue frontend** and **Python backend** with changes in how the **AWS S3 buckets** are handled and reconfiguration in the Kubernetes pods
- Adding visualisation of speech recognition in audio & video and face recognition in images
- **Migrating PostgreSQL database to Wikibase**, which was used to manage the data via SPARQL queries & an API
- Integrating **Redis caching** to optimise frequently requested data
- Utilising **AI assisted development** with GitHub CoPilot to speed up development
- Improving accessibility to **comply with WCAG AA**
- Migrating the existing **SAML authentication flow to OIDC** for support in multiple backend services

Tech stack: Vue, Python, TypeScript, FastAPI, Vite, Vitest, Testing Library, PostgreSQL, SPARQL, Redis, Docker, Kubernetes, AWS S3, Git, GitHub CoPilot

Practice Lead Development

Ordina Belgium, team Bold

Sep 2023 - Dec 2024

- **Mentored 13 fullstack & frontend developers** in their career path
- Organised **knowledge sharing** sessions
- Planned conference visits and learning opportunities
- Shaped the team's vision and **strategic direction**
- Wrote **bids and proposals** for new projects

Lead Frontend Developer | React

Securex

Apr 2023 - Sep 2025

- Negotiated about functionality and acted as **primary contact point** between business and team
- Migrated existing features of Mendix applications to React applications and integrated new features
- Implemented new features in the **3 design systems** and extended the use of Storybook
- Improved performance on complex forms with possible 1000+ dynamic input fields
- Redesigned the **architecture of the state management** to improve the performance of all pages
- Extended authentication flow to support FAS, **enabling Itsme login** for users.
- Integrated SurveyJS with custom styling and integrated PDF viewer
- Code reviewed and **coached frontend developers** to enforce best practices and improved test coverage
- Set up new React applications and setup GitHub Actions
- Bugfixing and improvements on 15+ other projects in the **NX monorepository**

Tech stack: React, TypeScript, Tailwind, NX, Storybook, SurveyJS, Cypress

Fullstack Developer | React & NodeJS

Politie Zone Antwerpen

Jul 2022 - Apr 2023

- Implemented new features in the React frontend with its own **design system**
- Developed new features for Node.js backend (Express.js, RabbitMQ, PostgreSQL) and backend-for-frontend
- **Improved test coverage** across frontend, backend for frontend and backend

Tech stack: ReactJS, NodeJS, Express.js, RabbitMQ, PostgreSQL, JSON, JSON Schema

Frontend Developer | Vue D'leteren Oct 2019 - Sep 2022

- Coached other frontend developers
- Did **massive code migrations** (Vue 2 to Vue 3, Vuex to Pinia, Webpack to Vite) and introduced unit tests
- Implemented SEO improvements, added Google Analytics tracking, improved loading time of the websites
- **Negotiated with the client** about features with collaboration of UX/UI designers

Tech stack: Vue, TypeScript, Vuex, Pinia, Webpack, Vite, Vue Test Utils, Git

Frontend Developer | Angular Port of Antwerp Mar 2019 - Jan 2020

- Set up the greenfield project in Angular, working alongside designer and Java backender
- Integrated Leaflet to draw a **live map of the incoming shipping vessels** to the port of Antwerp
- Managed data with RxJS that was retrieved via **Server-Sent Events**
- Finalised 2 Angular apps, used by Port of Antwerp and all Rhein river ports in France, Germany and Switzerland

Tech stack: Angular, TypeScript, NGRX, RxJS, Leaflet, Jasmine, Webpack, Git

Frontend Developer | Angular MLOZ Jan 2019 - Feb 2019

- Worked away the backlog and kickstarted implementation of new features
- **Coached junior developers** on the project

Tech stack: Angular, TypeScript, NGRX, RxJS, Jasmine, Bootstrap, Webpack, Git

Frontend Developer | Angular Wolters Kluwer Aug 2018 - Nov 2018

- Code reviewed the existing Angular application, **increased test coverage, and introduced e2e tests**
- Developed new pages and functionalities with the Syncfusion component library

Tech stack: Angular, TypeScript, NGRX, RxJS, Jasmine, Cypress, Syncfusion, Webpack, Git

Frontend Developer | Angular Liantis May 2018 - Jul 2018

- Integrated design system components into the new Angular website portal for their clients to existing apps

Tech stack: Angular, TypeScript, NGRX, RxJS, Jasmine, Bootstrap, Webpack, Git

Fullstack .NET Developer

AG Insurance (IS .NET Expertise Center team) Apr 2014 - Mar 2018

- Extended features in **multiple ASP.NET, ASP.NET MVC 5 web apps and batch programs** that ran every night
- Managed my own budget and time with **stakeholder negotiations** and reporting to management
- **Coached new developers** on new ASP.Net MVC5 web application with AngularJS and SQL Server database

Tech stack: C#, ASP.NET, ASP.NET MVC, SOAP, SQL Server, jQuery, TFS

Android Developer

Vrije Universiteit Brussel Oct 2013 - Jan 2014

Photographer

Self employed in secondary occupation, coverage of weddings, company events and parties Feb 2017 - Oct 2023

Education

Master of Science: Computer Science	Vrije Universiteit Brussel	Sep 2011 - Aug 2013
Bachelor of Science: Computer Science	Vrije Universiteit Brussel	Sep 2008 - Aug 2011

Projects

elkecodes.dev: Blog and portfolio implemented with Astro, <https://github.com/ElkeCodes/elkecodesblog>

Skills

Frontend: React, Vue, Angular, TypeScript, Tailwind, Tanstack Query, RxJS, Pinia
Backend: Node.js (Express.js), Python (FastAPI), PostgreSQL, SPARQL, SQL Server
DevOps & Tools: Docker, Kubernetes, AWS S3, GitHub Actions, Git, Webpack, Vite, Nx, Storybook
Testing: Vitest, Jest, Cypress, Testing Library
